- **Conclusion**
- **Overview**
- **Introduction**

The cryptocurrency industry is growing rapidly, yet most swapping platforms require users to connect their wallets, exposing them to security risks such as phishing attacks and contract exploits.

Coinswap.win is a wallet-free, non-custodial crypto-swapping platform that enables users to exchange assets securely without connecting their wallets. Powered by Solana, it ensures fast, reliable, low-cost, and highly efficient transactions.

With Coinswap.win, users can seamlessly swap over 1500 tokens supported on the platform.

Additionally, every successful swap rewards users with \$WIN, the platform's native token. Upon the platform's official launch, it will play a central role in the COINSWAP ecosystem.

#### • **Vision and Mission**

Its vision is to create a secure, decentralized, and user-friendly swapping experience without requiring wallet connections.

While its mission is to provide a non-custodial, Solana-powered swapping platform that prioritizes privacy, speed, and user empowerment.

#### • **Key Features**

##### • **Wallet-Free Swapping**

Unlike traditional decentralized exchanges (DEXs), Coinswap.win does not require users to connect their wallets. Instead, the platform uses a unique deposit address system, allowing users to send assets for conversion without risking their private keys.

- **Fast and Cost-Efficient Transactions**

Powered by Solana, ensuring:

- Lightning-fast transactions
- Low fees
- High throughput

## **2.3 Supported Asset Pairs**

Coinswap.win supports over 1500 token pairs.

Future updates will introduce additional assets and cross-chain swaps.

- **Earn \$WIN Tokens**

Users receive \$WIN tokens for every successful swap, making Coinswap.win not just a swapping platform but also a rewarding ecosystem.

- **Non-Custodial and Secure**

Users retain full control of their assets; there is no third-party custody, which ensures enhanced security. Also, transactions are fully decentralized, protecting users from centralized risks.

- **How COINSWAP Works**

- **Step-by-Step Process**

- Select the swap pair (e.g., Asset → SOL or SOL → USDT).
- Generate a deposit address from the COINSWAP platform.

- Send the asset to the provided deposit address.
- Receive the swapped asset directly in the designated wallet.
- Earn \$WIN tokens as a reward for using the platform.

This streamlined process ensures fast, secure, and hassle-free transactions on the platform.

- **Coinswap.win TOKEN (\$WIN)**

- **Token Overview**

- Token Name: Coinswap.win token
- Symbol: WIN
- Blockchain: Solana

- **Technology Stack and Solana Integration**

- **The Reason Why Solana?**

COINSWAP is built on Solana, chosen for its:

- Ultra-fast transaction speed (sub-second finality)
- Near-zero fees (ideal for micro-transactions and frequent swaps)
- Scalability (capable of handling thousands of transactions per second)
- Robust security (Solana's proof-of-history and proof-of-stake mechanisms)

- **How Solana Enhances Coinswap.win**

- Efficient, brilliant contract execution ensures seamless swaps.
- Decentralized validation secures transactions without central points of failure.
- Lower operational costs translate to cheaper and faster swaps for users.

By leveraging Solana's high-performance blockchain, COINSWAP delivers an optimized, cost-effective, and user-friendly swapping experience.

### • **Security and Privacy**

Coinswap.win is designed with security first principles, ensuring users' funds and data remain protected at all times.

- No Wallet Connection Required – Eliminates exposure to phishing attacks and smart contract vulnerabilities.
- Non-Custodial Transactions – Users maintain complete control of their assets.
- Fast and Efficient Transactions – Built on Solana, ensuring low fees and high-speed execution.
- Privacy-Focused – No need for personal information or wallet authorizations.

### • **Roadmap**

Q4 2024

1. Concept and Development
2. Creation concept for exchange and lottery. Building a Crypto-to-Crypto Exchange

Q1 2025

1. Launch
2. Launch of the exchange and implementation of the WIN token

Q2 2025

1. Creating a mobile app
2. Creating a mobile wallet app

Q3 2025

1. Creation of a platform for spot trading, cryptocurrency purchases for fiat currency

Future updates include cross-chain swaps, DeFi integrations, and expanded token utilities.

## 8. TOKENOMICS

Total Supply: WIN 1.000.000.000

Liquidity Pool: 92%

Marketing: 5%

Team: 3% - locked to 17 May 2025

(<https://app.streamflow.finance/contract/solana/mainnet/G8mLypfyE86zGtSycn3eqUVS4q8owN3dYLWi1bDUtKY4>)

## 9. Conclusion

Coinswap.win is redefining the crypto-swapping experience by offering a secure, private, and rewarding alternative to traditional DEXs.

Coinswap.win ensures seamless, decentralized swaps with enhanced security by integrating Solana's high-speed, low-cost blockchain.

With its wallet-free approach, \$WIN token rewards, and fast execution on Solana, Coinswap.win sets a new standard for non-custodial crypto swaps.
